The Institute of Computer Graphics and Vision is looking to fill the following position, starting 1 January 2018:

**System-Administrator 20h**

Tasks:
- linux server maintenance and configuration
- user and resource management
- scripting for admin tasks
- testing of new services and Open Source software

Your profile:
You are willing to work together, willing to learn and willing to communicate. Together with two experienced colleagues you will be the one to help out researchers with all questions in regard of information technology. You’ll offer help due to your knowledge of operating systems (mainly Linux, but also Windows and macOS) and will provide support with the occasional desktop problem. Ideally you’re a student at the TU Graz who’s willing to develop additional skills. We’d like you to consider working in this position part-time for a few years besides your studies.

We can offer you:
- payment according to Austrian KV stud. Mitarbeiter C a) for 20h/week
- infrastructure (*Your office in the vicinity of the lecture halls*)
- flexible work schedule
- opportunities for testing new hardware and software in the context of an innovative research environment

We use these technologies:
Ubuntu, Debian, Xen, LVM, Apache, Samba, OpenLDAP, Git, Gitlab, Cyrus, Postfix, Shorewall, isc-dhcp, DRBD, Postgres, Puppet, Logstash, Kibana, Sensu, Grafana, Seafile, Mattermost, Docker - *The more skills you already bring, the better :)*

Requirements:
- Proficient in both written and spoken English
- Willingness to learn
- Experience handling Debian-based Linux systems
- Scripting (Bash or Python)

Please send your applications to Prof. Dieter Schmalstieg: schmalstieg@icg.tugraz.at
